

For Immediate Release:

Jason Adams Talks Megalab Concrete System with the Add10 Gallons Concrete Podcast

Sparks, MD – October 1, 2021 - For Episode 23 the Add10 Gallons Concrete Podcast welcomes to the program Jason Adams. Jason is the President, CEO and creator of the Megalab concrete system.

Jason talks about his early days in the concrete industry and how that time period led him to bring together several top minds in the industry to create a revolutionary concrete system. The Megalab system takes aim at the common problems associated with standard concrete formulations and placement. The Add 10 Guys ask about the challenges of introducing a completely new concrete system, and Jason provides candid insight regarding current industry practices and what is in store for the near future.

You can download episode 23 of the Add 10 Gallons Concrete Podcast wherever you get your podcasts, and search “add 10 pod” on Instagram, Facebook, and YouTube for more great content.

The show hosts are all part of the Active Minerals International (AMI) technical development team dedicated to the concrete industry. AMI produces Acti-Gel® 208 purified magnesium aluminosilicate, a high-performance mix stabilizer, and rheology modifier used in a wide variety of cement-based applications.

The **Add 10 Gallons Concrete Podcast** was launched in 2020 to benefit the concrete industry. Show hosts and concrete engineers Paul Fendley, Joey Bell, and Josh Hare explore and discuss industry news, trends, upcoming events, and more amongst themselves and with experts from all facets of the industry. Guests offer insight and expertise on topics such as ready-mix production, materials, QC, equipment, academia, engineering, and many other areas of the industry.
