

For Immediate Release:

Active Minerals Announces Price Increases

June 9, 2022 SPARKS, MD— Active Minerals International, LLC (AMI) is increasing pricing up to 25% or as contracts allow. This increase is effective for all orders shipped on or after July 1, 2022 and is necessary to cover the sudden and unexpected rise in logistics, fuel, labor and packaging costs.

Additionally, the container surcharge will be adjusted higher by an additional \$175 for all exports beginning July 1, 2022. This surcharge is reviewed quarterly for adjustments.

The months ahead will be an enormous challenge with continued volatility in input costs and management of ocean freight. AMI remains well positioned to continue to be a consistent and reliable supplier of air-float kaolin and gellant attapulgate products.

Please discuss your individual status with your trusted AMI sales representative.
